1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art. The admitted prior art of Fig. 7 discloses the claimed invention except for the refrigerant tank connected to the high-temperature refrigerant circuit. The provision of a tank connected to the high-temperature circuit is seen to be a mere obvious duplication of parts, especially in view of the refrigerant tank 17 connected to the low-temperature circuit.

3. Claims 3-14 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
